

the **world's largest** supplier of
regulatory correct prescription
containers

A Gerresheimer Company

- Centor is one of the largest consumer packaging companies in the world and is a leader in the manufacture of custom and standard plastic packaging.
- Centor is much more than a supplier. We are a partner focused on adding value and helping customers build their businesses.

Centor Prescription Retail

- Focused on delivering exceptional customer value, Centor Prescription provides an unparalleled array of superior, regulatory compliant products to the pharmacy industry supplied through an efficient, national distribution network.
- Centor packaging is used in multiple pharmacy settings including Retail, Mail Order, Central Fill, and Repackaging industries. Our prescription ware is preferred by automation manufacturers for throughput efficiency and machine compatibility.

Screw-Loc® Vial & Closure System

Manufacturing the original for more than 40 years

- Following the United States Poison Prevention Packaging Act of 1970, Centor began manufacturing the Screw-Loc® child resistant prescription package. Considered the industry standard, the Screw-Loc® package has been protecting the lives of children for over 40 years.

1-Clic® Vial System

Popular & Preferred: 1-Clic® was selected 2 to 1 as the consumer preferred package for dispensed medications.*

- Opens easily with and slight turn
- Audible “click” to ensure closure is properly secured
- Regulatory compliant for “light and tight”

* Study conducted by Great Lakes Marketing, November 2011.

Vial Light & Moisture Testing

Only Centor passes the tests for **all** of its child-resistant offerings.**

USP 671 Standards**		1-Clic® Vial System	Screw-Loc® Vial System
Moisture Resistance – Tight		✓	✓
Light Resistance		✓	✓

- Of the top 20 drugs dispensed, 19 require packaging in a “tight and/or “tight and light resistant container. Only Centor passes the tests for all of its child-resistant offerings.**

**United States Pharmacopeia Chapter 671(USP 671) is designed to provide standards for the functional properties of plastic containers and their components used to package regulated articles. A container is intended to provide its contents protection in two areas: 1. Light Resistance — no more than 10% transmission, and 2. Moisture Vapor Transmission Rate (MVTR). To qualify as tight, no more than one of ten containers can exceed moisture transmission of 100mg per liter per day and none can exceed more than 200mg per liter per day.

For more than 100 years, Centor has been producing products that are considered the industry standard. Our prescription products are produced in the U.S. and are held to the highest quality standards, including USP 671.
