

Our vision:

A greener today, and even greener tomorrow.

Today, as the leader in sustainability and eco-friendly ways of helping our environment, Centor has implemented the following green initiatives:

- First to market a liquid oval using polyethylene terephthalate  recycled resin
- Prescription vial closures packed in cases without inner bags to significantly reduce waste
- Established partnerships to fully recapture all raw materials

Tomorrow, strategies in development include:

- Programs to reclaim and recycle prescription vials
- Vials made from FDA approved post-consumer recycled polypropylene 
- Manufacturing products using resins derived from renewable and compostable resources

Contact us about working together to shape the future of vial recycling.
